The conception of Nimrod is celebrated at the Spring Equinox (Easter) with the symbols of fertility (eggs, rabbits). This season is also preceded by 40 days of fasting (mourning) over the death of this same son of Semiramis (Tammuz), culminating in the celebration of his rebirth (resurrection) at Easter time. The harlot church has tied it to the time of the Passover and incorporated the Babylonish traditions into Christianity.

The birth of Nimrod (9 months later) at the time of the winter solstice is then celebrated currently as Christmas on December 25th. The early church never had any such celebration, nor was it suggested by scripture. The date of his birth is somewhat hidden by scripture but was likely at the time of Tabernacles, probably on the Day of Atonement. [9-1-17 MRJ]
